Socket Mobile’s barcode scanners can be wiped clean with a cloth dampened with isopropyl alcohol or water. Or, the barcode scanners can be wiped clean with a Sani-Cloth.

**Warning:** DO NOT IMMERSE IN WATER (scanner’s mechanics could be damaged)

DO NOT USE BLEACH FOR CLEANING (scanner’s material property may be affected)

*Also used to display the on-screen keyboard in Basic Mode (iOS only).*
1. Insert scanner into Charging Dock, 6 Bay Charger or Charging Adapter.
   - Bundles available for Charging Dock and 6 Bay Charger.

2. Insert USB or plug into wall port.

3. The scanner will beep twice indicating adequate power is being supplied to the unit.

   8 Hours

   Side LED status
   - Red = Charging
   - Green = Fully charged

Note: The scanner comes with a pre-installed rechargeable Lithium Ion battery, the initial full charging of the battery can take up to 8 hours.

**Power On**
Press and hold down the small power button on the side until the scanner beeps twice (low-high tone).
After connecting the scanner to your device, open an application. Place the cursor where you want to enter the scanned data.

1. Hold the scanner a few inches from the barcode.
2. Aim, press and hold the scan button.

By default, the scanner will beep, vibrate, and the side LED will flash green to confirm successful scan.

**Scanning Barcodes**

- **DuraScan D800**  
  ~4” to 8” scanning distance

- **DuraScan D840**  
  ~6” to 12” scanning distance

- **DuraScan D860**  
  ~2” to 30” scanning distance
Connect your barcode reader using one of the following Bluetooth connection modes:

## Bluetooth Connection Modes

**Bluetooth Connection Profiles**

<table>
<thead>
<tr>
<th>Bluetooth Mode</th>
<th>Description</th>
</tr>
</thead>
</table>
| **iOS Application Mode*** (Default)     | 1. Use with an App developed for iOS devices  
2. Software installation is required  
3. Mode to use for iOS applications that support Socket Mobile barcode readers |
| **Android/Windows Application Mode**    | 1. Software installation is required  
2. More efficient and reliable data communications for barcodes containing lots of data  
3. Mode recommended for applications supporting Socket Mobile barcode readers |
| **Basic Keyboard Mode**                 | • NO software installation needed  
• Connects to most devices  
• Good for barcodes containing small amounts of data  
• Barcode reader interacts with host device like a keyboard |

*By default, the barcode reader is set to iOS Application Mode*

*Note: To switch from one mode to the other you must remove the pairing information from both devices - host computer and the scanner. (see unpairing procedure on page 15)*

The scanner will unpair and automatically power off. The next time you power on the scanner, it will be discoverable.

Select the appropriate mode and pair with the second host device.
Socket Mobile Companion helps you configure Socket Mobile barcode readers from the convenience of a mobile device.

Register a device and extend your warranty by 90 days
  • Add multiple devices
  • Purchase accessories (limited availability)
  • Browse app partners

The Companion app enables you to configure the reader into the faster and more accurate App Mode, so it can be controlled by other apps, such as Shopify and Square, to name a couple of the 1000+ apps available.

The Socket Mobile Companion app is designed to ensure you get the maximum utility benefits from your Socket Mobile devices.

Scan this QR code with your mobile device to download our new app!

Connect Device in Basic Mode

In this mode the scanner functions and communicates similar to a keyboard. Therefore, the scanner will work with Notes, and any other application that supports an active cursor.

1. Power on the scanner. Make sure the scanner is discoverable (unpaired and Bluetooth LED blinking).
2. Go to Settings > Bluetooth.
3. Make sure the Bluetooth is “On” and scan for devices.
4. In the list of found devices, tap S8xx [xxxxxx] to Pair.
5. The scanner will connect to the host device.
6. The scanner will beep once after it has connected.

*If you have trouble connecting or pairing with host device, turn host device’s Bluetooth off/on, and/or perform factory reset on the scanner (see page 16).

Now you are ready to scan barcodes!
Connect Apple iOS Device in App Mode

Please check with your scanner application vendor or visit www.socketmobile.com/appstore to confirm your scanner-enabled application supports the scanner.

If you are using the scanner with an Apple iOS device and a scanner-enabled Application that does not provide instructions how to connect your scanner, please use the following steps.

1. Power on the scanner. Make sure the scanner is discoverable (unpaired). The Blue light should be blinking fast.

2. Scan the barcode to change the profile to App Mode (MFI-SPP).

   Use with iPad, iPod touch, and iPhones.

3. Turn on Bluetooth on the Apple device. Go to Settings > Bluetooth. A Bluetooth Devices search will begin.

4. Tap Socket D8xx[xxxxxx] in the list of other devices found. After a few seconds the status will change to “Connected” and the LED will stop blinking and turn solid blue.

   *Note: The characters in brackets are the last 6 characters of the Bluetooth Address.*

5. Launch your scanner-enabled Application. The scanner will beep once indicating that it is connected to the appropriate application.

*Now you are ready to scan barcodes!*
Connect Android Device or Windows (option 1) in App Mode

1. Power on the scanner. Make sure the scanner is discoverable (unpaired). The Blue light should be blinking fast.

2. Scan the barcode to change the profile to App Mode (SPP).

3. Turn on Bluetooth on your device. Go to Settings > Bluetooth. A Bluetooth devices search will begin.

4. Tap Socket S8xx[xxxxxx] in the list of other devices found. After a few seconds the status will change to “Connected” and the LED will stop blinking and turn solid blue.

*Note: The characters in brackets are the last 6 characters of the Bluetooth Address.*

5. Launch your scanner-enabled Application. The scanner will beep once indicating that it is connected to the appropriate application.

*Now you are ready to scan barcodes!*
Connect Windows (option 2) in App Mode

*Note: Make sure you have administrative privileges.*

1. Download the latest Socket Mobile CaptureSDK software from Socket Mobile’s support web page.

2. Follow the on-screen instructions to install the software.

3. In the CaptureSDK Settings, select an incoming Bluetooth serial COM port.

   *Note: If there is none, please click Ports to create at least one new incoming COM port in Bluetooth settings.*

4. Power on the scanner. Make sure the scanner is discoverable to be connected to Bluetooth (unpaired and Bluetooth LED blinking).

5. Launch CaptureSDK and click on the CaptureSDK icon in the task tray. In the pop-up menu, click Socket EZ Pair.

6. Scan the barcode that appears on the screen.

7. Open the Bluetooth settings, add and pair the scanner manually. (If prompted for a passkey, enter 0000)

8. Open SocketScan. From EZ pair, select the pre-paired Bluetooth option. Click on the scanner to pair.

   *Note: The characters in brackets are the last 6 characters of the Bluetooth Address.*

*Now you are ready to scan barcodes!*
Note: This procedure will put the scanner in discoverable mode.

**Step 1: Unpairing the scanner: Delete the Bluetooth Pairing**

If the scanner is paired with a device, unpair it before trying to connect to a different device.

1. Power on the scanner.
2. Press the scan button then power button and hold both until you hear 3 beeps.

The scanner will unpair and automatically power off. The next time you power on the scanner, it will be discoverable.

**Step 2: Remove or forget the scanner from the Bluetooth list on the host device.**

**Important:** Both steps above must be done to complete the unpairing.
Factory Reset will restore the scanner to factory default settings. Scan this barcode to reset your scanner:

If your scanner cannot scan the factory reset barcode, then follow the button sequence:

1. Power ON the scanner.

2. Press and hold the scan button\(^1\), then quickly press and release the power button\(^2\), while continuing to hold the scan button.

3. Release the scan button after the scanner beeps once (after 15 seconds). You will hear 5 more beeps then the scanner will power OFF.

Note: If you follow this sequence, but release the scan button too early (before 15 seconds and the beep) the Factory Reset will have failed.

Watch How To video: [https://vimeo.com/504468657](https://vimeo.com/504468657)
NOTE: If your scanner remains in an unresponsive state after following the Factory Reset, use the Restore Method as a last resort.

The Restore Method should be the last attempt used to revive an unresponsive scanner. It will reinitialize the core hardware.

1. Make sure your scanner is OFF.
2. Press and hold the power button until the LED light goes on and off (about 15 seconds)

Watch How To video: https://vimeo.com/504468686

</tbody>
</table>
### Always Active Mode

For busy days on the job, try using the Active Mode to keep you moving faster. Avoid the hassle of turning the scanner on again and reconnecting to your host device.

Scan one of the barcodes below and reconfigure the scanner to remain on longer.

*Note: Turn off the host device’s Bluetooth prior to scanning one of the alternate timer barcodes. Then turn the Bluetooth back on.*

**Power cycle the scanner (turn off/on).**

### Bluetooth Connection Modes

<table>
<thead>
<tr>
<th>Mode</th>
<th>Barcode</th>

**WARNING**: Failure to follow these safety instructions could result in fire or other injury or damage to the barcode scanners or other property.

**Carrying and Handling the scanners**: The Socket Mobile barcode scanner contains sensitive components. Do not disassemble, open, crush, bend, deform, puncture, shred, microwave, incinerate, paint, or insert foreign objects into this unit.

Do not attempt to disassemble the product. Should your unit need service, contact Socket Mobile technical support at [https://support.socketmobile.com/](https://support.socketmobile.com/)

Changes or modifications of this product, not expressly approved by Socket Mobile may void the user’s authority to use the equipment.

Do not charge the scanner using an AC adapter when operating the unit outdoors, or in the rain.

**Operating Temperature** - this product is designed for a maximum ambient temperature of 50° degrees C or 122° degrees F.

**Pacemaker Disclaimer**: We do not have specific information on the effect(s) of vibration or devices with Bluetooth wireless technology on pacemakers. Socket Mobile cannot provide any specific guidance. Individuals who are concerned with using the barcode scanner should immediately turn the device off.
FCC ID: LUBMA41

Federal Communication Commission Interference Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).
FCC Radiation Exposure Statement
This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device meets the FCC requirements for RF exposure in public or uncontrolled environments. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation
IC ID: 2529A-MA41S8

This device complies with Industry Canada license exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes: (1) l’appareil ne doit pas produire de brouillage, et (2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.
CE Marking & European Union Compliance

Products intended for sale within the European Union are marked with a CE Mark, which indicates compliance to applicable Directives and European Normes (EN), as follows. Amendments to these Directives or ENs are included:

CONFORMS TO THE FOLLOWING EUROPEAN DIRECTIVES

Low Voltage Directives: 2014/35/EU
EMC Directive: 2014/30/EU
RoHS Directive: 2011/65/EC
WEEE Directive: 2012/19/EC

Supplementary Information:

    ETSI EN 300 328
    ETSI EN 301 489
Telec Marking Compliance

Products intended for sale within the country of Japan are marked with a Telec mark, which indicates compliance to applicable Radio Laws, Articles and Amendments.
Battery Warning Statements

This device contains a rechargeable Lithium Ion battery.

Stop charging scanners if charging isn’t completed within the normal specified time (approx. 8 hours).

Stop charging the battery if the scanner case becomes abnormally hot, or shows signs of odor, discoloration, deformation, or abnormal conditions is detected during use, charge, or storage.

Stop using the scanner if the enclosure is cracked, swollen or shows any other signs of mis-use. Discontinue immediately and email support@socketmobile.com.

Your device contains a rechargeable Lithium Ion battery, which may present a risk of fire or chemical burn if mistreated.

Do not charge in hot temperatures over 60 degrees C or 140 degrees F.

- Never throw the battery into a fire, as that could cause the battery to explode.
- Never short circuit the battery by bringing the terminals in contact with another metal object. This could cause personal injury, or fire, and could also damage the battery.
- Never dispose of used batteries with other ordinary solid wastes. Batteries contain toxic substances.
Battery Warning Statements

- Dispose of used batteries in accordance with the prevailing community regulations that apply to the disposal of batteries.
- Never expose this product or the battery to any liquids.
- Do not shock the battery by dropping it or throwing it.

If this unit shows any type of damage, such as bulging, swelling or disfigurement, discontinue use and email support@socketmobile.com.

Product Disposal
Your device should not be placed in municipal waste. Please check local regulations for disposal of electronic products.

CAUTION:
Risk of explosion if battery is replaced by incorrect type.

Only use Lithium Ion rechargeable batteries provided by the manufacturer.
**Caution:** DO NOT STARE DIRECTLY INTO THE LED BEAM.

LED DEVICE:
The DuraScan D800, D840, and D860 contain a LED-type scan engine.

For the LED version of this engine, the following applies:

- Complies with EN/IEC 62471 (Exempt Group)
- LED output is in the 630-670nm range (visible red).
- LED devices are not considered to be hazardous when used for their intended purpose.

The following statement is required to comply with US and international regulations:

**Caution:** Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous LED light exposure.
CE MARKING AND EUROPEAN UNION COMPLIANCE
Testing for compliance to CE requirements was performed by an independent laboratory. The unit under test was found compliant with all the applicable Directives, 2004/108/EC and 2006/95/EC.

WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT
The WEEE directive places an obligation on all EU-based manufacturers and importers to take-back electronic products at the end of their useful life.

RoHS STATEMENT OF COMPLIANCE
This product is compliant to Directive 2011/95/EC.

NON-MODIFICATION STATEMENT
Changes or modifications not expressly approved by the party responsible for compliance.

CONFORMS TO THE FOLLOWING EUROPEAN DIRECTIVES
Low Voltage Directives: 2014/35/EU
EMC Directive: 2014/30/EU
RoHS Directive: 2011/65/EC
WEEE Directive: 2012/19/EC

Supplementary Information:
ETSI EN 300 328
ETSI EN 301 489
Limited Warranty

Socket Mobile Incorporated (Socket) warrants this product against defects in material and workmanship, under normal use and service, for one (1) year from the date of purchase. Product must be purchased new from a Socket Authorized Distributor or Reseller. Used products and products purchased through non-authorized channels are not eligible for this warranty support.

Warranty benefits are in addition to rights provided under local consumer laws. You may be required to furnish proof of purchase details when making a claim under this warranty.

**Consumables such as batteries, removable cables, cases, straps, and chargers: 90 day coverage only**

For more warranty information, please visit: https://www.socketmobile.com/support/downloads/product-support
SocketCare Extended Warranty Coverage

Purchase SocketCare within 60 days from the date of purchase of the reader.

Product Warranty: The barcode reader’s warranty period is one year from the date of purchase. Consumables such as batteries and charging cables have a limited warranty of 90 days. Extend your reader’s standard one-year limited warranty coverage up to five years from the date of purchase.

Additional service features are available to further enhance your warranty coverage:

- Warranty period extension only
- Express Replacement Service
- One-Time Accidental Coverage
- Premium Service

For detailed information visit: socketmobile.com/support/socketcare
